Plant and Soil **151**: 299–302, 1993.

Contents Volume 151 (1993)

Research articles

Phosphorus requirement and sources of nitrogen in three soybean (*Glycine max*) genotypes, Bragg, nts 382 and Chippewa 1
S.F.B.N. Gunawardena, S.K.A. Danso, F. Zapata

Carbon distribution in grass (*Festuca pratensis* L.) during regrowth after cutting – utilization of stored and newly assimilated carbon 11
G. Johansson

Wheat root biomass and nitrogen dynamics – effects of daily irrigation and fertilization 21
T. Kätterer, A.-C. Hansson, O. Andrén

Gas-exchange activity, carbonhydrate status, and protein turnover in root nodule subpopulations of field pea (*Pisum sativum* L. cv. *Century*) 31
P.-Å. Vikman, J.K. Vessey

Genotype-environment interaction and correlation between vegetative and grain production measures of potassium use-efficiency in wheat (*T. aestivum* L.) grown under potassium stress 39
J.J. Woodend, A.D.M. Glass

Phage sensitivity and host range of *Rhizobium* strains isolated from root nodules of temperate legumes 45
N.I. Novikova, E.A. Pavlova, E.V. Limeshchenko

Alleviation of soil acidity in Ultisol and Oxisol for corn growth 55
H. Ismail, J. Shamshuddin, S.R. Syed Omar

Yield responses of Nepalese spring wheat (*Triticum aestivum* L.) cultivars to inoculation with *Azospirillum* spp. of Nepalese origin 67
T. Bhattarai, D. Hess

Pyrolysis-field ionization mass spectrometry of agricultural soils and humic substances: Effect of cropping systems and influence of the mineral matrix 77
H.-R. Schulten, P. Leinweber

The kinetics of NH_4^+ and NO_3^- uptake by Douglas fir from single N-solutions and from solutions containing both NH_4^+ and NO_3^- 91
C. Kamminga-van Wijk, H.B.A. Prins

Inhibition of nitrate uptake by aluminium in maize 97
R.P. Durieux, W.A. Jackson, E.J. Kamprath, R.H. Moll

Elevated atmospheric CO_2 and feedback between carbon and nitrogen cycles 105
D.R. Zak, K.S. Pregitzer, P.S. Curtis, J.A. Teeri, R. Fogel, D.L. Randlett

Soil macrostructure and root growth of establishing seedlings 119
P.S. Cornish

Nitrous oxide and dinitrogen emissions from urine-affected soil under controlled conditions 127
R.M. Monaghan, D. Barraclough

Short communications

Nutrient and carbon dioxide release by interacting species of straw-decomposing fungi 139
C.H. Robinson, J. Dighton, J.C. Frankland, P.A. Coward

Preparation of iron oxide-impregnated filter paper for use in the P_i test for soil phosphorus 143
R.G.V. Bramley, S.P. Roe

Distribution of ^{15}N from ammonium fertilizer in field grown *Acacia* 147
N. Zakra, R.W. Weaver, G. de Taffin

Research articles

Plant and bacterial mucilages of the maize rhizosphere: Comparison of their soil binding properties and histochemistry in a model system 151
M. Watt, M.E. McCully, C.E. Jeffree

Genotypic differences in nitrogen assimilation in *Vicia faba*: Effect of nitrate 167
J.M. Caba, C. Lluch, F. Ligero

Emergence and growth of two non-nodulated soybean genotypes (*Glycine max* (L.) Merr.) in response to soil acidity 175
K.D. Ritchey, T.E. Carter, Jr.

Arsenate tolerance in *Agrostis castellana* and *Agrostis delicatula* 185
T. de Koe, N.M.M. Jaques

Differences among maize cultivars in the utilization of soil nitrate and the related losses of nitrate through leaching 193
F. Wiesler, W.J. Horst

Potential role of allelopathy in the soil and the decomposing root of Chinese-fir replant woodland 205
Q. Zhang

Regulation of NH_4^+ uptake in wheat plants: Effect of root ammonium concentration and amino acids 211
H.F. Causin, A.J. Barneix

Effectiveness of VAM fungi in nonsterile soils before and after optimization of P in soil solution 219
M. Habte, R.L. Fox

Heterogeneity of soil and soil solution chemistry under Norway spruce (*Picea abies* Karst.) and European beech (*Fagus silvatica* L.) as influenced by distance from the stem basis 227
A.S. Koch, E. Matzner

Growth and development of seminal and crown root systems in N-limited barley, and their contributions to nitrate acquisition during vegetative and generative growth 239
M. Mattsson, T. Lundborg, C.-M. Larsson

Iron deficiency in lentil: Yield loss and geographic distribution in a germplasm collection 249
W. Ernskine, N.P. Saxena, M.C. Saxena

Manganese nutrition and accumulation of phenolics and lignin as related to differential resistance of wheat genotypes to the take-all fungus 255
Z. Rengel, R.D. Graham, J.F. Pedler

Utilization of the ambient concentration as a criterion for steady state after exponential growth: Some culture experiments with optimum of suboptimum N nutrition 265
A.H.J. Freijsen, H. Otten

Assessment of lead availability in soils contaminated by mine spoil 273
M. Jopony, S. Young

Effects of a short-term p-hydroxybenzoic acid application on grain yield and yield components in different tiller categories of spring barley 279
O. Christen, J.V. Lovett

Effects of an organic manure on the transformations of ammonium nitrogen in planted and unplanted soil 287
S.P. Trehan, A. Wild
